

HIV Treatment

Easy Read

There is no cure for HIV.
But, taking HIV tablets will stop you from
getting sick.

If you have HIV, you will go to an HIV doctor
at a hospital.

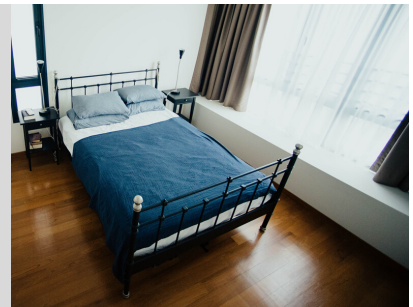

The HIV doctor will give you tablets to
stop you getting sick.

You must take the HIV tablets every day.

You might feel sick when you start taking HIV tablets. But if you take HIV tablets and rest, you will feel better soon.

You will have regular appointments with your HIV doctor to help you stay healthy.

If you take HIV tablets every day, you will live a long and healthy life.
