

Hepatitis C Treatment

Easy Read

Hepatitis C can be cured in 8-12 weeks,
with medication.

If you have hepatitis C, you will go to a hepatitis
C doctor or nurse at a hospital.

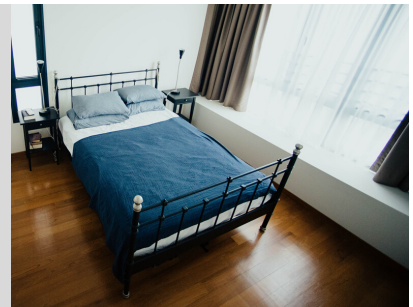

The hepatitis C doctor or nurse will give you
tests to see what hepatitis C medication you
will need.

The doctor or nurse will give you tablets to cure hepatitis C.

You might feel sick when you start taking hepatitis C tablets. But if you take hepatitis C tablets, drink lots of water and rest, you will feel better soon.

Tell your hepatitis C doctor or nurse if you keep feeling sick.

You must take your tablets everyday, until they are finished.
